SMART DASH AUTO MOUNT

USER MANUAL

PACKAGE CONTENTS

- 1 x IntelIGrip Wireless Charging Cradle Dock
- 1 x Suction Cup Mount
- 1 x Fastener
- 1 x USB-A to Type-C Charging Cable

PRODUCT FEATURES

- Qi Wireless charging phone mount designed to charge smartphones at 5W Capacity.
- Provides a full 360° rotation of viewing angles, allowing you to mount freely on your dashboard or windshield using the suction cup base, or from any air vent with the convenient air vent clip included with the product.
- Your phone begins to charge instantly once docked, so all you need to do is place your phone in the bracket and drive.
- Support for an adapter with output capacity of 5V/2A 9V/1.67A QC 3.0
- Compatible with the iPhone X, iPhone 8, iPhone 8 Plus, Samsung Note 8, Samsung Galaxy S8, Samsung Galaxy S9, and other wireless charging capable smartphone models.

PRODUCT LAYOUT

TIPS FOR APPLICATION/USE

- Avoid contact with any credit cards you might have or cards with magnetic strips or chips. If the IntelIGrip comes into contact with the card, demagnetization may occur.

TIPS FOR INSTALLATION

1. Choose where you plan to install your IntelIGrip, by connecting the cradle dock to the mount, then applying the suction cup base to your windshield.
2. Insert the fastener into the ball joint adapter. Insert the ball into the socket located on the back of the IntelIGrip bracket and tighten (angled to your desired position).
3. When you have determined a safe viewing position, firmly press on the suction cup base or tighten the clip accordingly. The suction cup should only be affixed to smooth, clean surfaces. Rougher surfaces may render the base suction cup ineffective.

TIPS FOR CHARGING

1. Connect the IntelIGrip by attaching the included Type-C-USB charging cable to your vehicle's USB Port, or external DC power source.
2. Place your Qi-compatible wireless charging mobile phone into the cradle near the top of the infrared sensor (see diagram). The bracket arms will automatically open when you do this. Place your phone in the open bracket against the Qi wireless charging area, and you will see the arms close tightly around your device. The wireless charger has now locked and has automatically entered the charging state. You will see the LED glow a solid red while the phone charges. You may also connect a USB charging cable to the USB port on the bottom of the IntelIGrip head if you wish to charge a device that requires a wired connection.

TIPS FOR APPLICATION/USE (Cont.)

3. When your phone is fully charged, the LED indicator light will emit a solid blue light.
4. When you are ready to remove your phone, gently tap the "touch key" on the left side of the unit with your finger and the bracket arms will release automatically. Be sure to hold your hand out underneath the phone as it releases; it will drop when the bracket arms release their grip.

LED FUNCTIONS

LED INDICATION	MEANING
Solid Red Light	The IntelIGrip is charging a device.
Solid Blue Light	Your device is fully charged, The IntelIGrip is in Standby Mode.
Light Flashes Red Every 0.5 Seconds	FOD Warning (Foreign object damage)
LED Flashes Alternately Red and Blue (2 seconds)	The IntelIGrip is connected to a power supply.

SPECIFICATIONS

Input: 5V/2A | 9V/1.67A
Output Power: 10W (Max)
Receiver Distance: 0-10mm
Working Frequency: 110-205KHz
Power Conversion: 72% (Max)

SAFETY PRECAUTIONS

- Carefully inspect your charger before attempting to use for the first time.
- Do not attempt to pierce, strike, or apply strong pressure with sharp or heavy objects. Strong impact or shocks could cause irreversible damage to the unit.
- Do not operate the charger if it has been exposed to any liquid or if it is visibly wet or moist.
- Do not charge devices while unattended.
- Keep the charger away from small children at all times.
- Always remember to unplug from your DC outlet when not using the charger.
- Do not expose the charger or any electrical parts to extremely high or extremely low temperatures or high pressure. Do not expose the charger to fire, direct sunlight, or other hot locations. This may cause the unit to generate heat, ignite, or explode. Using the charger in this manner may also result in a loss of performance and a shortened life expectancy.
- Do not attempt to disassemble or modify the IntelIGrip charger in any way.
- Immediately discontinue use of the charger if it has any visibly exposed parts or appears defective in any way.
- If this does occur, isolate the charger in a safe place and contact the tzumi Customer Support Team at tzumi.com/support.
